- HTAi Matters – Seville 2024, other HTAi news
- What's Happening – in and for patient and public involvement
- Publications

Welcome to our E-Bulletin

Dear PCIG Members

The HTAi 2024 Annual Meeting promises to be unforgettable! Responding to members' feedback, all Plenary Room sessions—including official ceremonies, plenaries, keynotes, and patient sessions—will utilize an AI real-time translation and captioning tool to enhance inclusivity for both virtual and in-person attendees. We will have plenaries with patient speakers, panels, and oral and poster presentations discussing the latest developments in patient and citizen involvement in HTA. Our heartfelt thanks to each of you for your continuous dedication to sharing knowledge and contributing to levelling up this conference's scientific program and activities. Some of this year's highlights are detailed below.

On Sunday, June 16, the workshop "Patient And Citizen Involvement In Health Technology Assessment: Networks For Sustainability And Innovation" will feature over 10 international speakers sharing methods and approaches to patient involvement and engaging in deep-dive dialogues. Special thanks to our outgoing chair, Ann Single, for her consistent leadership in the PCIG workshop, which has always been a great success.

PCIG member Chris Munoz will bring the patient perspective to Plenary 1, "Sustainable HTA For Sustainable Health Systems," on Monday, June 17. Additionally, Diego Fernando Gil Cardozo will contribute with his patient experience in Plenary 3, "Breaking Boundaries: Unleashing Innovation In Health."

The PCIG-endorsed panels are both taking place on Monday:

- PNo1: "Balancing Impact Versus Burden Of Patient Involvement In Health Technology Assessment," with Veronica Lopez Gousset, Eric Low, Catherine Koola Fischer, Ana Toledo Chávarri, and Aline Silva.
- PN12: "Getting Future-Ready by Learning from the Past! Transforming Patient Involvement Practices in HTA," with Neil Bertensen, Alexandra Moutet, Ann Single, Valentina Strammello, and Ana Toledo Chávarri.

For those in Seville, please visit us at the PCIG booth in the exhibition hall.

I look forward to meeting you virtually and in person!

Aline Silva
PCIG Co-Chair

Perspective chapter: Patient advocacy - From 'a seat at the table' to equal stakeholders

Authors: Janet L Wale, Dominique Hamerlijnck. DOI: 10.5772/intechopen.1005513

BOOK TITLE: Economics of Healthcare, Studies and Cases," ISBN 978-0-85014-891-6. Academic Editor, Prof Aida Isabel Tavares

Online First allows this chapter to be published before the entire book is ready for publication, where the chapter is searchable and citable by DOI. Once the rest of the book is ready, it will become part of the broader publication. You can view your chapter here: <https://www.intechopen.com/online-first/1188390>

Prof Kay Dickersin who was an important part of Project Lead writes: Yours was an excellent article "perspective chapter: patient advocacy – from a seat at the table to equal stakeholders"! Thank you! I sent it around to some friends and one of them asked whether there are other similar articles around. I didn't know of any....

Submitted by Janney Wale and Dominique Hamerlijnck

HTAi Annual Meeting in Seville

PCIG informal dinner, June 17 (Monday)

Every year at the HTAi Annual Meeting, PCIG members gather for an informal meal on Monday evening. Patients, caregivers and their representatives (and partners) are welcome for a self-sponsored dinner. The beautiful palace [Casa Manolo](#) is a 20-minute walk from the 2024 HTAi Annual Meeting Venue (Barceló Convention Centre). Dinner is a fixed menu that includes vegan and vegetarian options costing EUR 56.50 (drinks and dessert included). As the venue is limited to 45 people, you need to reserve a space by completing the linked [form](#). Please bring EUR 56.50 in cash on the night to pay and enjoy a fun evening with us!

When: 8 pm, Monday 17 June

Where: Casa Manolo. C/ Guadalquivir, 8, Casco Antiguo, 41002 Sevilla, Spain

RSVP by June 3: <https://forms.gle/UpZ84Sqz3caXgYr6g>

Patient and Citizen Involvement in HTA workshop, June 16 (Sunday)

You still have time to [register](#) for our half-day workshop, "Patient And Citizen Involvement In Health Technology Assessment: Networks For Sustainability And Innovation" (WS#22), on Sunday, June 16, from 1:30 pm - 5:00 pm.

PCIG Annual Business Meeting (ABM), June 18 (Tuesday)

Remember to add the PCIG ABM on Tuesday, 18 June, from 1:30 to 2:30 pm to your HTAi 2024 AM schedule. In line with our Terms of Reference, PCIG will hold its Annual Business Meeting (ABM) at the HTAi Annual Meeting. Date: Tuesday 18 June 2023. Time: 1:30 - 2:30 pm. Location: Room at Barceló Convention Centre to be confirmed. Packed lunch available. A Zoom link will be provided to virtual attendees. Agenda will be given to all members at least seven (7) days in advance. The notes of this meeting will be circulated to all members of the Interest Group documenting the actions planned for the forthcoming year.

HTAi 2024 Annual Meeting in Seville. MEETING THEME: A Turning Point for HTA? Sustainability, Networks and Innovation <https://htai.eventsair.com/htai-2024-annual-meeting>

With the growing emergence of new technologies and innovations, healthcare has seen significant changes. The HTA community through collaboration provides a means to pool resources and expertise for generating reliable evidence for decision-makers. Collaboration on a global scale is essential for data exchange, evidence generation, and building regulatory and incentive mechanisms.

Standard registration deadline: Thursday, June 6, 2024 at Midnight MDT (UTC-6)

Last-minute registration: Friday, June 7 to Wednesday, June 19, 2024

Workshop on 'Horizon Scanning' by international HealthTechScan (i-HTS)

This workshop will cover a range of important topics, including:

Early demand

Early Dialogue, Early Advice, and Scientific Advice

Artificial intelligence and digital tools for the identification of new and emerging health-related technologies

Health for all Policies

Disinvestment and the application of real-world evidence to gather application experience in practice

Capacity building initiatives by EuroScan/i-HTS

Workshop Venue: The meeting will take place in the facilities of the Andalusian Agency for Health Technology Assessment (AETSA). Address information will be shared with you soon.

Registration: To register, please use the following link: [Horizon Scanning workshop 2024 Seville – international HealthTechScan \(ihts.org\)](#). Your registration will be confirmed by the secretariat.

Target Audience: The workshop is accessible for anyone interested in Horizon Scanning for new and emerging health-related technologies.

Participation: The workshop is free of charge and limited to 50 participants.

Anil Metin, Disinvestment and Early Awareness, Technical Officer

Prepare to be enchanted by the vibrant city of Seville, Spain, as the backdrop for our HTAi 2024 Annual Meeting. Nestled along the Guadalquivir River, Seville captivates with its rich history, stunning architecture, and lively culture.

[HTAi 2024 Asia Policy Forum](#)

The 2024 Asia Policy Forum is taking place November 6-8, 2024 in Seoul, South Korea. Discussions will include the topic, "Collaboration: Building Bridges in HTA".

WHO resolution on social participation for universal health coverage, health and wellbeing

At World Health Assembly 77 (WHA77), May 27 - June 1, the assembly adopted the resolution for social participation for universal health coverage (UHC). The resolution recalls the 2023 UN General Assembly's political declaration on UHC which promotes participatory, inclusive approaches to health governance for UHC. It highlights the role of participation in empowering people and communities, enhancing inclusive and transparent decision making, the need to promote the participation of people who are vulnerable and/or marginalised and the variety of mechanisms for facilitating two-way dialogue between governments and people, communities and civil society. It also notes that need to monitor and evaluate participation.

Through the long sitting day numerous countries and non-State actors spoke in support of social participation expressing beliefs that it would play a role in improving health literacy, reducing misinformation, improving decision making and hastening UHC.

HTAi is a WHO non State actor and was represented at WHA77 by our Outgoing Chair, HTAi Vice-President Ann Single. You can read more about the resolution [here](#).

Webinar with PAHO/RedETSA

Recently, HTAi signed a Memorandum of Understanding with the [Pan American Health Organization](#) and RedETSA. The first joint activity was a webinar in Spanish and English exploring the crucial role of patients in HTA. More than 320 people attended the webinar. The panelists were:

Ann Single, HTAi

Ana Toledo-Chávarri, RedETS

Andrea Brígida de Souza, CONITEC

Manuel Donato, CONETEC

Eva Maria Ruiz de Castilla, LAPA

If you were unable to take part on the day, you can now watch the recordings [here](#) with subtitles in both Spanish and English.

What's Happening

[Celebrating 25 years of NICE](#)

For 25 years, NICE has helped practitioners and commissioners get the best care to people fast, while ensuring value to the taxpayer.

In this [short video](#), our chief executive, Dr Sam Roberts, reflects on our journey. She acknowledges key milestones and outlines how we'll continually adapt to meet the needs of the health and care system over the next 25 years.

And in our [in-depth feature article](#), we celebrate the wide-ranging impact we've had. We also explore the organisational changes we're making to ensure we continue to add value.

[International Recognition Procedure seeks to speed up licensing process](#)

Developers of new medicines can now submit licensing applications through the Medicines and Healthcare products Regulatory Agency's (MHRA) new International Recognition Procedure (IRP). NICE will continue conducting timely appraisals for medicines which receive regulatory approval through the IRP.

IRP is expected to improve patient access to new medicines for UK patients. It allows the UK Medicines and Healthcare products Regulatory Agency (MHRA) to consider the expertise of trusted regulatory partners around the world.

Priorities 2024 Conference

At the beginning of May 2024, the Priorities 2024 Conference was held in Bangkok, Thailand. This year's theme was 'shaping the future of health prioritisation: strategies for sustainable solutions'.

Hugh McGuire, senior adviser in our NICE Advice team, delivered the results of a study assessing the value of [NICE Advice](#) to pharmaceutical and healthtech companies seeking to enter the NHS market.

Free training on 'Assessing healthcare using outcomes that matter to patients'

We've teamed up with the European Health Data Evidence Network (EHDEN) Academy to offer an online course on [assessing healthcare using outcomes that matter to patients](#). It covers:

patient health outcomes and why they're important

standardisation of measurement

data for benchmarking.

The course is free but you'll need to set up an EHDEN Academy account and log in to access it. It's quick and easy to do.

Development and Harmonisation of Methodologies for Assessing Digital Health Technologies in Europe (ASSESS DHT) <https://assess-dht.eu/>

NICE is a partner in ASSESS DHT. It's a European project that aims to increase the adoption of trustworthy and effective digital health technologies. As part of the project, we're developing a tool to help developers identify evidence gaps and optimise their evidence generation plans. We are also working with partners to develop an interim manual for digital health technology assessment. We'll pilot its use by assessing an AI-based digital health app.

FDA platform designation guidance out for consultation

<https://www.fda.gov/regulatory-information/search-fda-guidance-documents/platform-technology-designation-program-drug-development>

To speed up drug applications, the FDA has laid out [new guidance](#) on how to request a platform designation that can smooth subsequent applications for biotechs working off the same reproducible technology.

The agency defines a platform technology as any well-understood reproducible technology, including a nucleic acid sequence, molecular structure, mechanism of action, delivery method, vector or a combination of these. This is especially key for companies in the gene editing space, where a platform can create multiple treatments for multiple different genes.

The new guidance explains that once a sponsor receives an abbreviated new drug application (ANDA), new drug application (NDA) or biologics license application (BLA) for a treatment, they can then request a platform designation. The guidance was created by the FDA's Center for Drug Evaluation and Research (CDER) and the Center for Biologics Evaluation and Research (CBER). The FDA is accepting comments on the platform designation guidance until July 29.

World Health Assembly endorses resolution on social participation

<https://www.who.int/news/item/29-05-2024-world-health-assembly-endorses-resolution-on-social-participation>

At the 77th World Health Assembly (WHA), Member States endorsed a resolution to implement, strengthen and sustain regular and meaningful social participation in decision-making processes for health.

Social participation means empowering people, communities and civil society through inclusive participation in decision-making processes that affect health across the policy cycle and at all levels of the system.

IPPOSI launched the recruitment phase of its third Citizens' Jury initiative

IPPOSI is inviting 25 members of the public to explore the question: "Should we increase the use of AI (Artificial Intelligence) in health care in Ireland?"

As with previous juries, in order to achieve the target of a representative sample of the population of the Republic of Ireland (based on the latest census data), we need as many people as possible, from as diverse a reach as possible, to apply to become a juror.

As valued members of the IPPOSI community, we are seeking your support to spread the word about this exciting initiative as far and as wide as possible. We would be grateful if you could inform and encourage your members, (as well as their colleagues, families and friends) to express their interest in participating in this citizens' jury before the deadline of June 21st.

To share this news:

a link to the [IPPOSI webpage](#) with details of the initiative

a link to the [recruitment form](#)

a downloadable [communications pack](#) (word.docx, 600Kb in size, click to download) including sample text for newsletter/emails, example social media posts, hashtags, images and more...

Our Citizens' Jury Coordinator, Therese McDermott, can be reached at tmcdermott@ipposi.ie.

Further details on the jury are available [here](#) or at the links above.

PEOF 2024 is not just an event; it's a movement, and we are excited to have continued the work in Baveno, Italy, this May!

Meaningful Dialogues: Conversations with global experts redefining healthcare with groundbreaking ideas and actions.

Expansive Networks: This year, we welcomed new voices, including experts from the [Bill & Melinda Gates Foundation](#), [WHO](#), and the [EU Commission](#). It's a melting pot of ideas that promises to spark deep, systemic change.

Innovative Tracks: Specialized sessions focusing on the latest trends in patient data usage, AI in healthcare, and the significant strides we're making in maternal health.

1. Interactive Workshops:

Hands-on co-creation sessions to help shape the tools and strategies for tomorrow's patient engagement landscape.

2. Made With Patients Awards: Celebrating innovation and dedication at the Made with Patients Awards, where we honor those making exceptional contributions to patient engagement. Discover the finalists now and [sign up to join the live stream](#).

3. Catalyst Conversations:

Pivotal discussions to push the patient movement to new heights of effectiveness and sustainability.

More opportunities to connect:

Secure your spot on the [waiting list](#) for PEOF 2025's in-person event, or subscribe to the PEOF [mailing list](#) so you're always in the know about upcoming events and sessions!

On behalf of the EPF, EUPATI, and PFMD teams

Identification of Medicinal Products (IDMP) and Pharmacovigilance:

A Use Case

One of the benefits of global implementation of the IDMP standards is to facilitate global surveillance and monitoring of substandard and falsified medicinal products.

IAPO and Synergist's Side Event at the 77th World Health Assembly – Held on Monday, 27 May 2024

<https://www.iapo.org.uk/node/15670>

On the sidelines of the [77th World Health Assembly \(WHA77\)](#) taking place from 27 May to 1 June 2024 in Geneva (Switzerland), IAPO and [The Synergist](#) jointly hosted the Side Event:

“Leveraging patient organizations as key partners in the delivery of universal health coverage”

The event was broadcast via [IAPO YouTube channel](#) to reach a wider audience around the world, and all content of the Side Event was captured live by a graphic facilitator. Event speakers included:

Dani Mothci, CEO, IAPO (moderator)

Amanda Bok, Chief Strategy Officer, The Synergist (moderator)

Justin Koonin, President, ACON & Member, Political Advisory Panel for the UHC Movement

Kira Koch, Technical Officer, Special Programme on Primary Health Care, World Health Organization

Pamela Cipriano, Steering Committee Co-Chair, UHC2030

Lara Bloom, President and CEO, The Ehlers-Danlos Society

Brian O'Mahony, CEO, Irish Haemophilia Society

Mark Barone, Founder and General Manager, Intersectoral Forum of NCCs/NCDs in Brazil (ForumCCNTs)

Antoine Boivin, Canada Research Chair in Partnership with Patients and Communities, Université de Montréal

[See speakers and moderators' biographies](#)

This Side Event was supported by Roche, Boehringer Ingelheim and CSL Behring

[ICHOM–NEJM Catalyst Implementation Prize: Deadline Approaching](#)

Exciting [Abstracts Competition!](#) Deadline: May 31, 2024

The ICHOM–NEJM Catalyst Implementation Prize is a unique chance to present your work in transforming care delivery through patient-centered outcomes and amplify the profile of your organization.

The winner, chosen by NEJM Catalyst, will be presented at the ICHOM 2024 Conference, taking place 21-22 October in Amsterdam. For categories and details see abstract.ichom.org
